

SOURABH RAMTEKE

Software Engineer

+91-7089046319 | sourabhramteke@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | Balaghat, MP

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable backend systems, REST APIs, and microservices using Java, Spring Boot, React.js, FastAPI, and PyTorch. Proficient in Data Structures, Algorithms, and full-stack development, with a track record of shipping AI-powered and event-driven web applications.

EDUCATION

National Institute of Technology, Tiruchirappalli
Master of Computer Applications (MCA), CGPA: 7.8

Jul 2023 – May 2026
Tiruchirappalli, TN

Govt. Holkar Science College, Indore
B.Sc. Computer Science, 80.63%

Jul 2020 – May 2022
Indore, MP

WORK EXPERIENCE

Software Engineer Intern

Mphasis IT & Services

Feb 2026 – May 2026

Hyderabad, India

- Built and tested backend REST APIs using **Java** and **Spring Boot** within Agile/Scrum sprint cycles.
- Diagnosed and resolved production bugs, participated in code reviews, and collaborated with cross-functional teams to deliver features on schedule.

PROJECTS

PlantVision AI – Plant Disease Detection | [GitHub](#)

May – Jun 2026

- Python, FastAPI, PyTorch, ResNet50, Custom CNN, React.js, Tailwind CSS, REST APIs*
- Developed an AI web app detecting **38 disease classes** across 14 plant species with **97.3% accuracy** using ResNet50.
- Built **FastAPI** REST endpoints for real-time image inference, returning confidence scores and Top-5 predictions in under 200ms.
- Designed a **React.js** dashboard with disease diagnosis, treatment recommendations, and CNN vs. ResNet50 model comparison.

SkyWays – Airline Booking System | [GitHub](#)

Feb – May 2026

- Java, Spring Boot, Spring Cloud, React.js, MySQL, Apache Kafka, Razorpay, JWT, WebSocket*
- Architected a **microservices-based** platform with independent services for users, flights, bookings, and payments via Spring Cloud.
- Secured endpoints with **JWT** role-based access control (Admin/Customer) and integrated **Razorpay** for online payments.
- Decoupled booking notifications using **Apache Kafka**, reducing inter-service coupling and improving system resilience.

Campus Connect – Social Networking Platform | [GitHub](#)

Nov 2025 – Apr 2026

- Java, Spring Boot, React.js, Zustand, PostgreSQL, Redis, Apache Kafka, WebSocket, JWT*
- Built a full-stack social platform with posts, comments, likes, a follow system, and **real-time chat** via **WebSocket**.
- Implemented **Redis** caching for session management and feed performance; used **Kafka** for async push notifications.
- Managed frontend state with **Zustand** in React.js, delivering a responsive UI backed by scalable Spring Boot microservices.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C, C++

Backend: Spring Boot, Spring Cloud, FastAPI, Node.js, REST APIs, JWT, Redis, Apache Kafka, WebSocket

Frontend: React.js, Zustand, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL

AI/ML: PyTorch, CNN, ResNet50, Pandas

Tools & DevOps: Git, GitHub, Docker, AWS, Postman

CERTIFICATIONS & ACHIEVEMENTS

Amazon HackOn Season 4 — Cleared Coding Round (Jun 2024)

LeetCode: [Sourabh_101](#) — Solved **800+** **DSA problems**, peak contest rating **1800+**

GeeksforGeeks: [sourabhracv1w](#) — Active problem solver with consistent DSA practice
